

Summary of the Dataset

Structure of the folders of the Dataset

The root directory in the repository comprises one main folders, namely “teaLeafBD”. The folder contains seven sub-folders with the following names: 1. Tea algal leaf spot, 2. Brown Blight, 3. Gray Blight, 4. Helopeltis, 5. Red spider, 6. Green mirid bug, 7. Healthy leaf. These sub-folders contain the captured images in JPG format. Each image resolution is 1200px x 1600px. Approx size of the image is 226 KB. A total of 5278 pictures are contained in these seven sub-folders. Figure 1 illustrates the folder and sub-folder structure that categorizes the images. It is worth noting that this structure is consistent across all folders with similar names, and as such, only a portion of it is depicted in the figure.

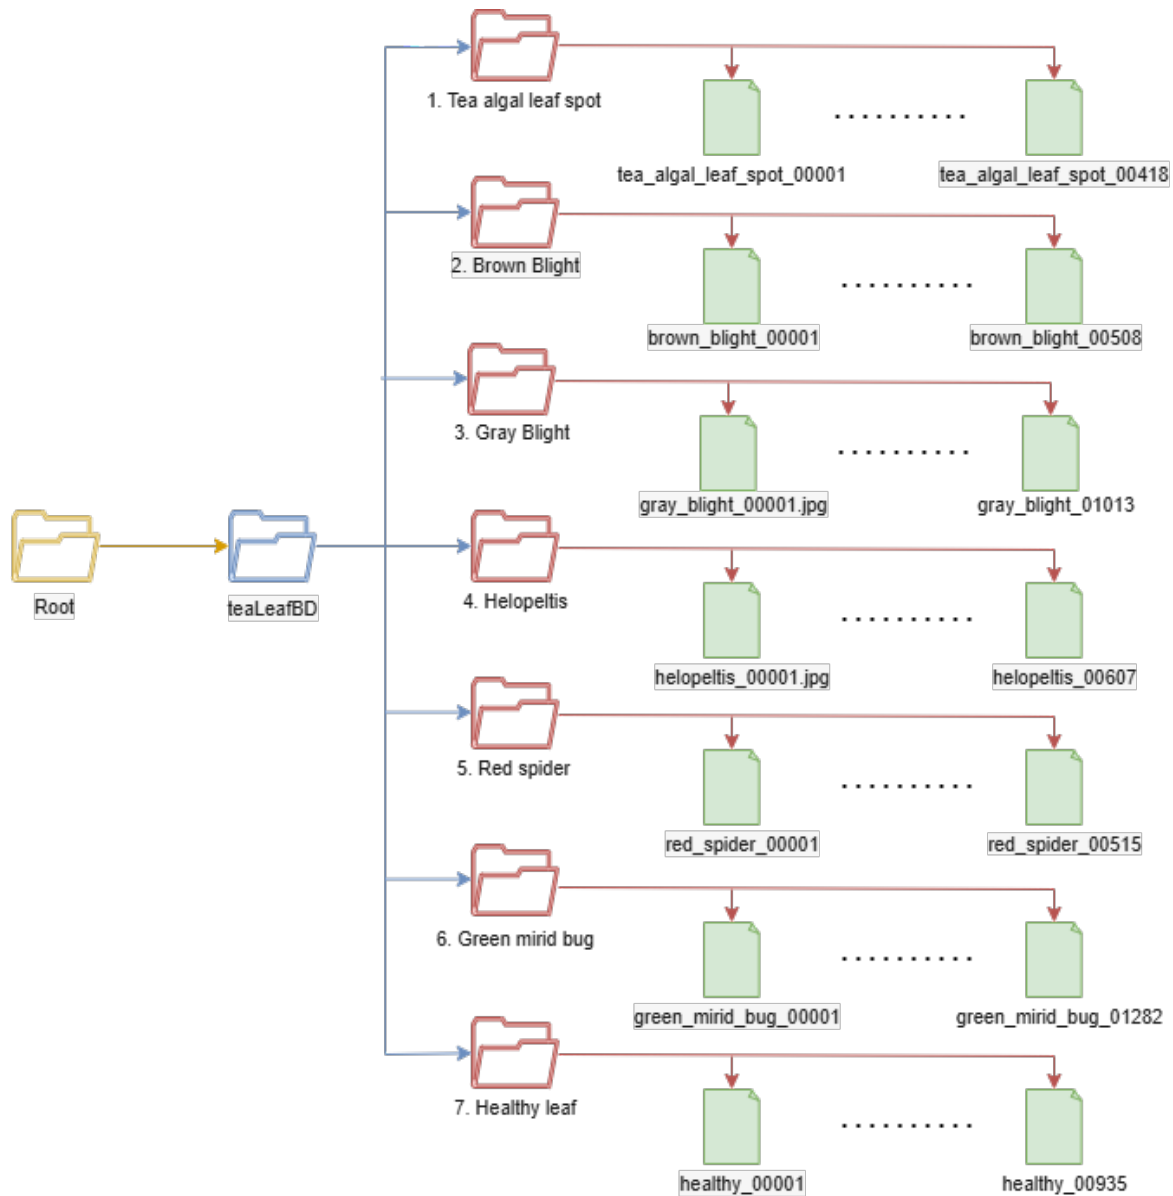

Figure 1: Structure of the Dataset Directory.

DATASET		
CLASS	Category / Folder	Number of images
1	Tea algal leaf spot	418
2	Brown Blight	508
3	Gray Blight	1013
4	Helopeltis	607
5	Red spider	515
6	Green mirid bug	1282
7	Healthy leaf	935
TOTAL		5278

Table 1. Number of Images for Each Class.

Table 1 visually represents the breakdown of total images according to the classes. Each class contains a different number of images. The classes and subfolders are the same as mentioned and are serially organized as in the “teaLeafBD” folder.
